Review Update: The game has died as it stands. I have stood by the developer for a long time believing this wouldn't be the case and I feel like a traitor for changing my review but Here is where it stands. The old review has been left for the current released aspects of the game, edited to remove the comments about changes that were promised and never came through. The game IS fun as it stands but it isn't complete and likely never will be. If the game ever does resume and achieve completion (I REALLY wanna see the ending!) Then I will be HAPPY to change this but I can no longer support this game. Old review://////// This game is amazing. It is a beautiful work of art It IS a perma-death game. This will put some of you off so if that sort of thing does not suit you then this game is not for you Now that's not to say it is perfect. There are some bugs still as it is early development and as a permadeath game one small screw up can easily undo hours of hard work and it is extremely unforgiving if you don't pay attention to the instructions or at least glance at the guide. Got the game full price, got the game for my wife full price, soon to get it for more family full price. Worth it to me bugs and all.. I dislike the controls and expected more from the game, the music

randomly cuts out and I find it annoying when it doesn't. It's bland and crashes on me.. The game is going good, but what I'm confused about is the story that goes on in the beginning and then you start in a hut (I see a plane and then later on you hear a plane crashing??) I think it's good just need some bug fixes and story fix. The developer left this game. I paid for it because he was on an interesting path, but they moved on.. Clunky controls? Clunky controls. I tried to get into it, and I still intend to, but as of now I just can't get around the fact that the diagonal movements barely work. At best, diagonal is a slight incline/decline. Very awkward to move in other areas as well. Hopefully there will be a control update to help.. Great little game to play. Little odd here and there and it gets harder the longer you stay alive so you got to build up them walls to keep the enemy out.. I like it, it has great potential!. I played 15 minutes of this game which was enough to see this game for what it was: a mix of Terraria and Stardew Valley except absolutely all the good bits have been taken out. Add to that the fact that it doesn't load when I click "Load game", it doesn't close when I click "Close" (running in the background, cheeky cheeky!) and has no options to change the graphics except for Vsync On/Off and Full/Windowed mode. The choice is clear - avoid. Honestly, I cannot understand how a game that is half the cost of another - better - similar version can't have at least half the content.
